Interlake - Eastern Regional Health Authority

Interlake-Eastern Regional Health Authority does not isolate the costs of running the site cafeterias separately from other food service provision costs. It is required practice to capture all food service costs in the Dietary Department and to allocate the costs out to the various food service functions provided by the department (cafeteria services being one of those functions) using a formula that estimates the resource requirements of each function. Therefore, the cost figures provided represent estimates of the costs to run the cafeteria using allocation methods standard to the healthcare sector.

The revenues are an actual representation of the monies collected from cafeteria or café services .
