VIA Electronic Correspondence

Re: FOI Request number 2021 001 a, b

Further to our decision letter of April 19th, 2021, I am writing regarding your access requests under the *Freedom of Information and Protection of Privacy Act* (FIPPA or the Act). Thank you for your payment of \$120.00 for the balance of the processing fees (\$60 for each request). Kindly find a scan of the receipt attached. Should you wish us to post the original of your receipts, please let me know.

As we have received your final payment, we are providing you with the responsive records.

I have attached a copy of the index of records (revised to correct a page amount) with the responsive records embedded in the document..

Should you have any questions about the handling of your request, please contact me and kindly provide the FOI number of your request.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Rosalyn Reid'.

Notes:

1. Data is for the fiscal year 2019/2020 (April 1, 2019 to March 31, 2020).
2. "Patient Deceased" is the reason that the procedure is no longer required, however, it does not mean that the death is related to the proposed procedure. A death may occur for other reasons.
3. Because one patient may be on the waitlist for both an MR and CT, or more than one MR or CT, the 221 cancelled procedures due to patient death represent only 195 patients.
4. Scheduled Procedure Date is the original scheduled date. In some cases the procedure is specifically scheduled later than it would be otherwise available. This is because there are medical reasons requiring the patient to have imaging after a specified period of time, in some cases beyond the government target. These records comprise many of these cases and are not typically included in published wait times.
5. Scans are assigned a priority level by a Radiologist upon review of the requisition, with priorities ranging from 1 to 4. Ontario Health has set wait time targets for each priority. More information can be found at this link: <https://www.hqontario.ca/System-Performance/Measuring-System-Performance/Measuring-Wait-Times-for-Other-Surgeries-and-Procedures>. The target times shown correspond to the priority level assigned to each case.

6. The last update reflects the last date the waitlist was updated, for which these cases would be updated, reflecting the time the hospital became aware of the patient's death.
7. Dates of referral to specialist are not collected.
