Access Request: FOI 09-21

Dear 

This is a disclosure letter for your Freedom of Information (FOI) request received by our office on June 24, 2021 for information related to patient deaths while on a waitlist for a surgical procedure.

1. Scope of the request

We understand the request to include: *Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2020-21. Please break the data out by procedure and case info – date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question. (Note: Many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations)*

2. Requested records which do not exist – N/A

3. Disclosure –

Note: The data from April 1, 2019 to December 31, 2020 has been provided already in a previous request. The data included for the request at hand is for the remaining time for the fiscal year - January 1, 2021 to March 31, 2021.

Operating Room Cases - Fiscal Year January 1, 2021 to March 31, 2021 Analysis

For the period of January 1, 2021 to March 31, 2021, Hamilton Health Sciences Corporation (HHSC) completed a total of a total of 6,541 surgeries.

Additional procedures would have also been completed in HHSC procedure rooms, such as cardiac investigation units and the electrophysiology lab. As these procedures are either non-surgical in nature, or not reportable to Ontario Health or Cor Health, they are not included in this disclosure as they are not responsive to the request. In addition, this analysis does not include emergency surgeries or trauma-related surgeries as these patients are not placed on the waitlist and therefore, do not get reported to the Ministry of Health.

During the relevant fiscal period time frame:

- 12 patients were removed from the waitlist with the removal reason listed as "deceased." This is a rate of 0.183% for a 3 month period. Regardless of timeframe, deaths on a waitlist represent less than 1% of patients.
- 2 patients (16%) who had been removed from the waitlist had a change in their medical condition precluding their ability to proceed with surgery.

No system delays (hospital related resource delays) were noted for any surgical patients who had passed away.

Please see additional PDF attachments containing additional information. A description of the acronyms used in the attached spreadsheets is below.

Acronym Meanings:

DART Dates Affecting Readiness to Treat

DARC Dates Affecting Readiness to Consult

CABG Coronary Artery Bypass Graft

“Cancellation Date” = date HHS became aware of the patient death.

Often this occurs through appointment follow up for surgical planning purposes.

Maximum government timelines that a patient can remain on a waitlist are based on a prioritization schedule. A patient's priority ranking can fluctuate during the time they are waitlisted for their procedure in the event of a health decline.

The priority level reported is at the time of ‘cancellation’. Historical changes in priority are not available, nor are they tracked.

For Ontario Health and Cor Health, the timeframe between referral and procedure/cancellation covers two wait time periods: Wait 1; and Wait 2. Therefore, it is important to consider both waiting periods and related recommended wait times.

Wait 1 is the time waiting between referral date to surgeon and consultation date.

Wait 2 is the time waiting between decision to treat (which may or may not be the consultation date) and the procedure date/cancellation date.

Every procedure has varying recommended wait periods allowed for Wait 1 and Wait 2 as per Ontario Health and Cor Health guidelines.

The surgeon is responsible for choosing the Wait 1 and Wait 2 priority for each patient. There are 1 of 4 choices available. These choices are shown in the coloured coded columns.

Note that Priority 1 are considered emergent patients

Wait 1 applies to new referrals only

Wait 1 = NA means a Recurring or follow up patient

Referral Date = NA means Patient was a follow up patient/existing patient.

Procedure date = NA means Patient was not given a surgery date.

Patient Death is a removal reason from the wait list and does not mean that the death is related to the waiting procedure.

Recommended wait time is an established wait time set by Ontario Health and Cor Health (for cardiac surgeries)

Wait 1 and Wait 2 Priority noted for each patient represents their priority status at time of removal from the wait list. It is not reflective of priority changes that may have occurred throughout the wait.

Patient Related Delay Reasons:

- *Pre-defined interval follow up* - represents a delay where the patient must recover and/or, mature (in the case of pediatric patients) before proceeding with the surgery.
- *Change in medical condition/patient not fit for surgery/not medically ready, further work up required* - represents delays due to the patient's condition which precludes proceeding with surgery.
- *Patient chooses to defer* - refers to instances where the patient had declined the surgery date provided and requests surgery delay.
- *Waiting for other procedure* - represents delays where the surgery in question cannot proceed until another procedure/treatment is completed beforehand.

4. Fees –

Thank you for your payment of \$30.

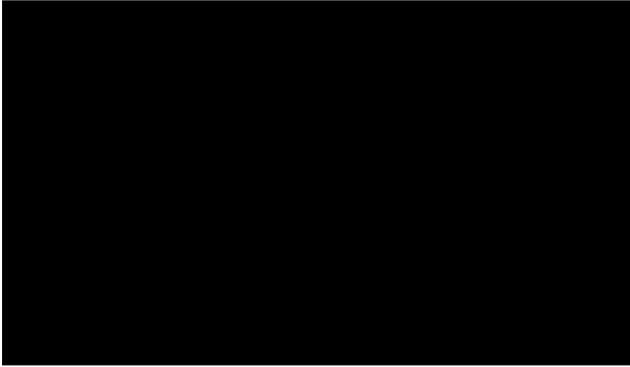

5. Appeal

You may appeal the following to the Information and Privacy Commissioner/Ontario by writing to the Commissioner's Office within thirty days of this notice of HHSC's decision. More information about the requirements to appeal decisions under FIPPA is available on the Commissioner's website (www.ipc.on.ca).

Access Request: FOI 10-21

Dear 

This is a disclosure letter for your Freedom of Information (FOI) request received by our office on June 24, 2021 for information related to patient deaths while on a wait list for either a diagnostic scan or a consultation with a specialist.

1. Scope of the request

We understand the request to include: *Please provide data on the number of patients that died while on a waiting list for either a diagnostic scan or a consultation with a specialist in fiscal year 2020-21. Please break the data out by procedure and case info., date the patient went on a waiting list, date for the meeting with the specialist or date for diagnostic scan (if scheduled), and date of cancellation. Please also note the government's target time for providing the meeting or scan in question. (Note: Many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations.)*

- 2. Requested records which do not exist** – With regard to the data pertaining to patients who died while on a waiting list for a consultation with a specialist, on July 20th you were advised this component cannot be fulfilled due to the nature of the wait-time reporting. Cases are only entered into the wait-time reporting system once the patient has agreed to surgery. Patients who have passed away prior to consultation will not make it to the stage where they are entered into the wait-time reporting system, as the data entry for wait 1 data (time from referral to consult), is entered retroactively.

Thank you for your clarification confirming that the information you are seeking is the diagnostic imaging reporting review limited to only CT and MRI scans that are reportable to Ontario Health.

- 3. Fees** – HHS waived the fees associated with the processing of this request.
- 4. Disclosure** – see attached for responsive data.

CT and MRI Diagnostic Scans - Fiscal Year 2020/2021 (April 1, 2020 to March 31, 2021)

For the Fiscal Year 2020/2021 Hamilton Health Sciences (HHS) completed 47, 017 CT and MRI scans. During the relevant fiscal period, 461 patients were removed from the waitlist with the removal reason "deceased." This is a rate of 0.9804% for the year.

When reviewing the waiting period, it is important to note patient-related and system-related delays for waits.

- 4 (0.86%) deceased patients had lack of facility resources (could mean lack of staff, a malfunctioning machine, closure, etc.) contributing to their wait.
- 5 (1.08%) of deceased patients experienced a change in medical condition contributing to their wait. (For example, they rely on an oxygen tank and cannot go into the room with one, accommodations are required for their MRI, such as anti-anxiety medication to proceed with an MRI, etc.)
- 52 (11.27%) patients chose to defer their diagnostic scan.

“Cancellation Date” = date HHS became aware of the patient death. Often this occurs through appointment follow up for surgical planning purposes.

Maximum government allowable waitlist timelines are based on a prioritization schedule. A patient’s priority ranking can fluctuate during the time they are waitlisted for their procedure in the event of a health decline. As such, we are unable to provide a maximum number of waitlist priority timelines.

Unlike surgical wait times, Diagnostic Waits Times have only 1 waiting period called a Wait 2. This is the time from Referral to the actual procedure date.

The referring physician along with the Diagnostic Unit are responsible for choosing the Wait 2 priority for each patient. The maximum designated wait is provided beside the priority column.

“Patient Death” is a removal reason from the wait list and does not imply that the death is related to the waiting procedure.

“Recommended wait time” is an established wait time set by Ontario Health.

“Wait 2 Priority” noted for each patient represents their priority status at time of removal from wait list. It is not reflective of wait-list priority changes that may have occurred throughout the wait.

Patient Related Delay Reasons:

“Change in medical condition”/“patient not fit for surgery/not medically ready”, “further work up required” represents delays due to the patient’s condition that precludes proceeding with surgery.

“Patient chooses to defer” - represents instances where the patient had declined the surgery date provided and requests surgery delay.

5. Appeal

You may appeal the following to the Information and Privacy Commissioner/Ontario by writing to the Commissioner’s Office within thirty days of this notice of HHSC’s decision. More information about the requirements to appeal decisions under FIPPA is available on the Commissioner’s website (www.ipc.on.ca).
