Dear Kristen Schulz:

**RE: Access to Information Request – HE12-23G**

Thank you for your Access to Information Request received in this office on May 25, 2022, pursuant to *The Freedom of Information and Protection of Privacy Act* (the Act) requesting:

***"Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2021-22.  
Please break the data out by procedure and case info – date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation.  
Please also note the government's target time for providing the procedure in question.  
(Note: many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations)"***

In accordance with sections 5 and 8 of the Act, this is to inform you that your access request has been fully granted. Please find attached, five pages of records responsive to your request.

We note that a cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example almost 38% of the cancellations were for patients waiting for cataract surgery which is a non-fatal condition. Surgeries can be delayed because it is not medically safe for the patient to undergo surgery.

---

Should you be dissatisfied with the response you receive or the manner in which your request is handled, as per section 49 of the Act you may, within one year of being given written notice or from the date deemed to be the last day of notice, apply for a formal process review by submitting a written request to:

Office of the Information and Privacy Commissioner  
503, 1801 Hamilton Street  
REGINA SK S4P 4B4

If you wish to contact us, please direct your correspondence to Tammy Davey, Senior Policy Analyst at [tammy.davey@health.gov.sk.ca](mailto:tammy.davey@health.gov.sk.ca). Please cite the assigned Ministry of Health identifier number when making an enquiry.

Yours truly,

Chantelle Probe  
Director, Health Information and Privacy  
Chief Privacy Officer

### Surgical cancellations between 01-Apr-2021 and 31-Mar-2022 where the reason for cancellation was death of the patient

The information is based on 29-May-2021 refresh of the Saskatchewan surgical registry data mart. There are 343 records for this time period.

The Date of Referral to Surgeon is not a mandatory field so is missing for most records.

The Booking Date is the date that the booking form was received by surgical scheduling office.

The Cancellation Date is the date when the surgical booking was removed from the wait list. The cancellation date may not be the date of death. It could be the date that the cancellation was recorded in the system.

A cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example 39% of these cancellations were for patients waiting for cataract surgery which is a non-fatal condition.

The Saskatchewan surgical registry does not contain contextual information as to why a patient may have waited. In order to determine whether a wait time contributed to a negative patient outcome, a review of each case file with care providers would be required.

While there are processes in place to ensure the accuracy of the information contained in the report, there are system variations that may cause local surgical cancellations to not get updated properly in the surgical registry and require manual adjustments post-data upload (which are subject to human error).

| Procedure Group                                 | Surgeon Priority | Date of Referral to Surgeon | Booking Date | Scheduled Date | Cancellation Date |
|---|------------------|-----------------------------|--------------|----------------|-------------------|

### Surgical cancellations between 01-Apr-2021 and 31-Mar-2022 where the reason for cancellation was death of the patient

The information is based on 29-May-2021 refresh of the Saskatchewan surgical registry data mart. There are 343 records for this time period.

The Date of Referral to Surgeon is not a mandatory field so is missing for most records.

The Booking Date is the date that the booking form was received by surgical scheduling office.

The Cancellation Date is the date when the surgical booking was removed from the wait list. The cancellation date may not be the date of death. It could be the date that the cancellation was recorded in the system.

A cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example 39% of these cancellations were for patients waiting for cataract surgery which is a non-fatal condition.

The Saskatchewan surgical registry does not contain contextual information as to why a patient may have waited. In order to determine whether a wait time contributed to a negative patient outcome, a review of each case file with care providers would be required.

While there are processes in place to ensure the accuracy of the information contained in the report, there are system variations that may cause local surgical cancellations to not get updated properly in the surgical registry and require manual adjustments post-data upload (which are subject to human error).

| Procedure Group    | Surgeon Priority | Date of Referral to Surgeon | Booking Date | Scheduled Date | Cancellation Date |
|--------------------|------------------|-----------------------------|--------------|----------------|-------------------|
| Cataract Procedure | 3 month          | .                           | 03-Mar-2021  | .              | 06-Oct-2021       |

### Surgical cancellations between 01-Apr-2021 and 31-Mar-2022 where the reason for cancellation was death of the patient

The information is based on 29-May-2021 refresh of the Saskatchewan surgical registry data mart. There are 343 records for this time period.

The Date of Referral to Surgeon is not a mandatory field so is missing for most records.

The Booking Date is the date that the booking form was received by surgical scheduling office.

The Cancellation Date is the date when the surgical booking was removed from the wait list. The cancellation date may not be the date of death. It could be the date that the cancellation was recorded in the system.

A cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example 39% of these cancellations were for patients waiting for cataract surgery which is a non-fatal condition.

The Saskatchewan surgical registry does not contain contextual information as to why a patient may have waited. In order to determine whether a wait time contributed to a negative patient outcome, a review of each case file with care providers would be required.

While there are processes in place to ensure the accuracy of the information contained in the report, there are system variations that may cause local surgical cancellations to not get updated properly in the surgical registry and require manual adjustments post-data upload (which are subject to human error).

| Procedure Group                                     | Surgeon Priority | Date of Referral to Surgeon | Booking Date | Scheduled Date | Cancellation Date |

## Surgical cancellations between 01-Apr-2021 and 31-Mar-2022 where the reason for cancellation was death of the patient

The information is based on 29-May-2021 refresh of the Saskatchewan surgical registry data mart. There are 343 records for this time period.

The Date of Referral to Surgeon is not a mandatory field so is missing for most records.

The Booking Date is the date that the booking form was received by surgical scheduling office.

The Cancellation Date is the date when the surgical booking was removed from the wait list. The cancellation date may not be the date of death. It could be the date that the cancellation was recorded in the system.

A cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example 39% of these cancellations were for patients waiting for cataract surgery which is a non-fatal condition.

The Saskatchewan surgical registry does not contain contextual information as to why a patient may have waited. In order to determine whether a wait time contributed to a negative patient outcome, a review of each case file with care providers would be required.

While there are processes in place to ensure the accuracy of the information contained in the report, there are system variations that may cause local surgical cancellations to not get updated properly in the surgical registry and require manual adjustments post-data upload (which are subject to human error).

| Procedure Group                                    | Surgeon Priority | Date of Referral to Surgeon | Booking Date  | Scheduled Date | Cancellation Date |

### Surgical cancellations between 01-Apr-2021 and 31-Mar-2022 where the reason for cancellation was death of the patient

The information is based on 29-May-2021 refresh of the Saskatchewan surgical registry data mart. There are 343 records for this time period.

The Date of Referral to Surgeon is not a mandatory field so is missing for most records.

The Booking Date is the date that the booking form was received by surgical scheduling office.

The Cancellation Date is the date when the surgical booking was removed from the wait list. The cancellation date may not be the date of death. It could be the date that the cancellation was recorded in the system.

A cancellation due to patient death does not necessarily infer that they died because they were waiting for surgery. For example 39% of these cancellations were for patients waiting for cataract surgery which is a non-fatal condition.

The Saskatchewan surgical registry does not contain contextual information as to why a patient may have waited. In order to determine whether a wait time contributed to a negative patient outcome, a review of each case file with care providers would be required.

While there are processes in place to ensure the accuracy of the information contained in the report, there are system variations that may cause local surgical cancellations to not get updated properly in the surgical registry and require manual adjustments post-data upload (which are subject to human error).

| Procedure Group                                  | Surgeon Priority | Date of Referral to Surgeon | Booking Date | Scheduled Date | Cancellation Date |
