

Madam,

On January 27, 2023, we received your request for access to information, which is formulated as follows:

"Please provide documentation on the impact on the province's electricity system and ratepayers of the federal government's decision to require 100% of all passenger cars and trucks sold by 2035 to be zero issue. Be sure to include any estimates or analysis of necessary changes to power generation needs, transmission requirements, local distribution infrastructure, household upgrades, and consumer costs.

Please also provide copies of any materials provided to the Federal Government regarding this topic and their announcement. The deadline for this application is March 1 · 2021 to present. »

Research has been undertaken to trace information regarding the subject of your request. A response to your request will be sent to you no later than February 16, 2023.

Pursuant to section 46 of the Act respecting access to documents held by public bodies and the protection of personal information (chapter A-2.1), we inform you that if the 20-day period set by law for responding to you is not respected, you will have the right to appeal to the Commission d'accès à l'information. You will find attached an explanatory note concerning the exercise of this recourse.

Please accept, Madame, the expression of my distinguished sentiments.

Francois-Xavier Peloquin

Québec

Good morning,

Here is the answer to your question:

- No impact of the pan-Canadian standard, since Quebec has already provided for this prohibition and the Quebec regulatory obligation is under development and supported by its own laws and regulations;
- No material was provided by the MELCCFP to the federal government regarding their pan-Canadian ZEV standard announcement, whether related to the electricity system, taxpayers or other subjects.

Best regards

Madam,

This is in response to your request for access to information received on January 27, 2023, which is worded as follows:

"Please provide documentation of the impact on the province's electricity system and ratepayers of the federal government's decision to require 100% of all passenger cars and trucks sold by 2035 to be zero issue. Be sure to include any estimates or analyses of necessary changes to power generation needs, transmission requirements, local distribution infrastructure, household upgrades, and consumer costs. Please also provide copies of any materials provided to the Federal Government regarding this topic and their announcement. The deadline for this application is March 1, 2021 to present. »

In accordance with section 47 of the Act respecting access to documents held by public bodies and the protection of personal information (chapter A-2.1) ("the Access Act"), we inform you that the Ministère de l'Économie, de l'Innovation et de l'Énergie does not hold any document, the checks carried out having not made it possible to trace any documents relating to the subject of your request.

If you wish to contest this decision, you can do so with the Commission de l'accès à l'information. Attached you will find an explanatory note concerning the exercise of this recourse.

Please accept, Madame, the expression of my distinguished sentiments.

Pierre Bouchard
