Please provide data on the number of patients that died while on a waiting list for either a diagnostic scan or a consultation with a specialist in fiscal year 2022-23.

Please break the data out by procedure and case info- date the patient went on a waiting list, date for the meeting with the specialist or date for diagnostic scan (if scheduled), and date of cancellation.

Please also note the government's target time for providing the meeting or scan in question. (Note: Many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations.)

The requestor has also been advised that the diagnostic review is limited to CT and MRI scans as reportable to Ontario Health.

2. Disclosure –

CT and MRI Diagnostic Scans - Fiscal Year 2021/2022 (April 1, 2022 to March 31, 2023)

For the Fiscal Year 2021/2022 Hamilton Health Sciences (HHS) completed 103,322 CT and MRI scans.

During the relevant fiscal period, 606 patients were removed from the waitlist with the removal reason "deceased." This is a rate of 0.587% for the year.

When reviewing the waiting period, it is important to note patient related and system related delays for waits.

15 (2.48%) patients chose to defer their diagnostic scan contribution to their wait.

7 (1.16%) deceased patients had lack of facility resources contributing to their wait.

10 (1.65%) of deceased patients experienced a change in medical condition contributing to their wait.

35 (5.78%) patient were rescheduled due to data entry error

7 (1.16%) patient was rescheduled due to earlier appointment

"Cancellation Date" = date HHS became aware of the patient death. Often this occurs through appointment follow up for surgical planning purposes.

Maximum government timelines are based on a prioritization schedule. A patient's priority ranking can fluctuate during the time they are waitlisted for their procedure in the event of a health decline.

As such, we are unable to provide a maximum number.

Unlike surgical wait times, Diagnostic Waits Times have only 1 waiting period called a Wait 2. This is the time from Referral to the actual procedure date.

The referring physician along with the Diagnostic Unit are responsible for choosing the Wait 2 priority for each patient. The maximum designated wait is provided beside the priority column.

Patient Death is a removal reason from the wait list and does not imply that the death is related to the waiting procedure.

Recommended wait time is an establish wait time set by Ontario Health.

Wait 2 Priority noted for each patient represents their priority status at time of removal from wait list. It is not reflective of priority changes that may have occurred throughout the wait.

Patient Related Delay Reasons:

Change in medical condition/patient not fit for surgery/not medically ready, further work up required represents delays due to the patient's condition which precludes proceeding with surgery.

Patient chooses to defer represents instances where the patient had declined the surgery date provided and requests surgery delay.
