Notes:

1. Data is for the fiscal year 2022/2023 (April 1, 2022 to March 31, 2023).
2. "Patient Deceased" is the reason that the procedure is no longer required, however, it does not mean that the death is related to the proposed procedure. A death may occur for other reasons.
3. Because one patient may be on the waitlist for both an MR and CT, or more than one MR or CT, the 374 cancelled procedures due to patient death represent only 325 patients.
4. Scheduled Procedure Date is the original scheduled date. In some cases the procedure is specifically scheduled later than it would be otherwise available. This is because there are medical reasons requiring the patient to have imaging after a specified period of time, in some cases beyond the government target. These records comprise many of these cases and are not typically included in published wait times.
5. Scans are assigned a priority level by a Radiologist upon review of the requisition, with priorities ranging from 1 to 4. Ontario Health has set wait time targets for each priority. More information can be found at this link: <https://www.hqontario.ca/System-Performance/Measuring-System-Performance/Measuring-Wait-Times-for-Other-Surgeries-and-Procedures>. The target times shown correspond to the priority level assigned to each case.

6. The last update reflects the last date the waitlist was updated, for which these cases would be updated, reflecting the time the hospital became aware of the patient's death.

7. Dates of referral to specialist are not collected.
