**Notes:**

1. Data is for fiscal year 2022/23 (April 01, 2022 to May 31, 2023).
2. "Patient Deceased is the reason that the procedure is no longer required, however, it does not mean that the death is related to the proposed procedure. Cause of death are not collected in the database.
3. Where the referral data field is left blank, the patient was a pre-existing patient and not a new referral.
4. The government target time is based on a priority system. Additional information is available at this link: <https://www.hqontario.ca/System-Performance/Measuring-System-Performance>. The wait time shown was reflective of the case priority at the time the hospital was notified that the procedure was no longer required. It does not reflect any priority changes and and priority wait times that may have occurred throughout the patient's wait time on the wait list.
5. For the scheduled procedure date column, blank data fields means that the procedure had not yet been scheduled. In some cases a delay of the procedure is required due to reasons specific to the patient, such as a pre-defined interval follow up (which represents a delay where the patient must recover or mature i.e. in the case of a pediatric patient, or an antecedent procedure).
6. In some cases a patient may choose to delay surgery and request a new date.
