Dear Kristen Schulz:

Re: Full Disclosure - OUR FILE# NSHA-NSHA-116

On 07/03/24, Nova Scotia Health (NSH) received your request under the *Freedom* of Information and Protection of Privacy Act (FOIPOP Act).

We understand your application to be for a copy of the following:

Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2023-24. Please break the data out by procedure and case info – date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question. (Note: many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations)

Please find a copy of the records located in response to your request. We are providing these records to you in their entirety.

We are now closing your file.

Should you have any questions, please do not he sitate to contact me.

You have the right to seek a review with the Review Officer within 60 days of receiving this decision. Complete details of the process are outlined on the website of the Office of the Information & Privacy Commissioner: Request a Review | Office of the Information and Privacy Commissioner for Nova Scotia.

Sincerely,

Rozi Colbourne

FOIPOP:

NSHA-2024-116

Request Description:

Data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2023-24. Please break the data out by procedure and case info – date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question.

Data Description:

In the attached dataset we can see that 373 patients died while waiting for surgery among over 18,500 patients who were on the waiting list for surgery during the fiscal year 2023/2024. NSH does not have info on cause of death, which is a function of the Medical Examiner's Office, but we can see from the procedures that many individuals were waiting for, that there is not an automatic relationship between being on a wait list and cause of death. For example, many people were waiting for cataract surgery, hip or knee replacement, and other similar procedures. We cannot comment on the probability of death avoidance if surgery were performed. It is worthwhile noting that this data is based on our booking system and there are sometimes patients inappropriately left on the system even though a decision has been made by the patient and surgeon not to pursue surgery, thus the mortality rate among those waiting may be falsely high.

FOIPOP 2024-116: NS Health Expired Patients on Surgical Waitlist
