RE: Access Request OH24-047

Dear Kristen,

I am writing to update you on your request under the Freedom of Information and Protection of Privacy Act (FIPPA), which was received by our office on November 18, 2024.

Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2023-24. Please break the data out by procedure and case info – date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question. (Note: many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations)

A search has been conducted and the responsive records have been reviewed. A decision has been made to grant access to the responsive records. The official responsible for making the access decision to this record is Matthew Anderson, President and CEO, Ontario Health.

Section 57 of FIPPA requires fees to be charged for processing a request. The fee for processing your request was \$330. The breakdown for your fee is as follows:

- \$330 for search time and records preparation based on 11 hours of time @ \$30 per hour

Ontario Health has already received full payment for this request.

You may request the Information and Privacy Commissioner of Ontario ('the IPC') to review this decision within 30 days from the date of this letter. The IPC's address is Suite 1400, 2 Bloor Street East, Toronto, Ontario, M4W 1A8. The appeal fee for a request like yours is \$25.00, payable by cheque or money order to the Minister of Finance. This fee must be included with your correspondence with the Commissioner's office. You may wish to refer to the IPC website at www.ipc.on.ca, or phone the IPC at 1-800-387-0073, for details.

Should you have any questions, please contact us. We would appreciate you using our request number OH24-047 in any further correspondence with Ontario Health about this request.

Sincerely,

Adam Roffel
Senior Specialist, Freedom of Information
Ontario Health

foi@ontariohealth.ca

Surgery cancellations while on waitlist where cancellation reason = patient death

see Exclusions Tab

Data Source: Wait Time Information System

* In some instances, the scheduled procedure date was not submitted by the hospital to the WTIS. Hospitals may enter a default value containing "January 1, 9999" until the scheduled date becomes known. Blank scheduled procedure dates are also common where the procedures are unscheduled

Note: The information provided should be interpreted with caution. Mortality can be affected by many complex and interrelated factors (e.g. clinical, socioeconomic, cultural). The above surgical statistics do not indicate that patients passed away as a result of wait times for a surgical procedure.

ServiceArea / ServiceDetail1	Decision To Treat Date	Scheduled Procedure Date * (see note above)	Referral Date	Procedure No Longer Required Date (Cancellation Date)	Procedure No Longer Required Reason (Cancellation Reason)	Wait Time Target (Days)

Inclusion/Exclusion Criteria:

1. Includes waitlist entries with cancellation dates between April 1, 2023 to March 31, 2024 where cancellation reason = patient
2. Cancer surgery treatment cases only; palliative, reconstructive and diagnostic cancer surgery (WTIS Service Detail 2) are excluded
3. Includes elective cases categorized as Priority Levels 2, 3 and 4; Excludes Priority Level 1 emergency cases and cases with multiple entries
4. For patients with multiple waitlist entries, only the waitlist entry with the latest create date is included

Data Source:

Waitlist data: Wait Time Information System (WTIS)

Query Date: November 27, 2024

Surgery - Wait List Deaths

The overall number of people who died while on a waiting list for a surgery in 2023-24 is 1,557.

Note: The above number constitutes 0.70% of the average wait list size for FY2324

Procedure No Longer Required Reason = Patient Death (data from April 1, 2023 to March 31, 2024).

Note: The information provided should be interpreted with caution. Mortality can be affected by many complex and interrelated factors (e.g. clinical, socioeconomic, cultural). The above surgical statistics do not indicate that patients passed away as a result of wait times for a surgical procedure.
