Dear **Kristen Schulz,**

We are writing in response to your request for the following records:

> ***Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2025-26. Please break the data out by procedure/surgery and case info - date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question. (Note: many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations). Date range: April 1, 2025 to March 31, 2026***

Please find attached the requested record.

You may request a review of VCH's response within 30 working days of receiving this email by writing to the following address:

Office of the Information and Privacy Commissioner for British Columbia

PO Box 9038, Stn. Prov. Govt.

Victoria, BC V8W 9A4

Telephone: (250) 387-5629

FOI Request: *Please provide data on the number of patients that died while on a waiting list for surgery or a procedure in fiscal year 2025-26. Please break the data out by procedure/surgery and case info - date the patient was referred to a specialist, decision date, date for the procedure and date of cancellation. Please also note the government's target time for providing the procedure in question. (Note: many hospitals/health regions were able to identify such cases as they track the reason for cancelled operations).*
Date range: April 1, 2025 to March 31, 2026

Response:

The information is provided on the following pages.

Total number of diseased patients: 189
Cancellation Reason: PATIENT DECEASED

**Note: this number is dependent on clerical staff receiving accurate information from the patient's family during the booking process. As a practice, VCH only tracks cause of death for patients on a surgical waitlist if they are actively receiving care at one of our sites. However, the total number of patients identified may also include those who passed away while not admitted to a VCH site and the cause of death is not captured in all cases. As such, this information should not be used to establish a direct correlation between surgical wait times and patient death.*
